## One World Order: Agenda 21; ESG Scores

**Review: Agenda 21 aka Agenda 2030**, is an action plan constructed by the **United Nations** to inventory and control **ALL** land, water, minerals, plants, animals, construction, information, energy, production, law enforcement, and all human beings in the world through using and manipulating the "Climate Change" hysteria.

**The World Economic Forum (WEF)** started in 1971 and was founded by **Klaus Schwab** as a non-governmental organization (NGO). This forum (WEF) states; "a self-selected alliance of **governments, corporations, and civil society organizations (NGO's)** are the best way to **manage the world**." They are known for their "initiatives" such as the **Great Reset**. "You will own nothing and like it!" DOGE is defunding many NGO's that are funding Agenda 21 ideologies.

**The Green New Deal** is a proposed framework in the United States aimed at addressing **climate change** and economic inequality through a series of ambitious policy initiatives. It was first introduced in 2019 by Representative Alexandria Ocasio-Cortez (D-NY) and Senator Ed Markey (D-MA) in the form of a non-binding resolution. The core idea is to transition the U.S. to 100% renewable energy within a decade while simultaneously tackling social and economic issues like poverty, income inequality, and racial injustice, -Grok. This will cost trillions of dollars creating a New Society.

**Social Justice:** Agenda 21 puts the wealthy and the poor on the same playing field. No one can have more than their neighbor. It's a redistribution of wealth. No one can have more food, energy, transportation, children, water, housing, etc. than their neighbors. This is how they achieve "justice" for the earth's resources being redistributed among the people. Diversity Equality and Inclusion (DEI) and Critical Race Theory (CRT) are derived from Agenda 21.

**Open Borders:** It is a direct attack on the sovereignty of our nation, and it is demoralizing to the immigrants that came here legally. This causes more division among people groups resulting in civil unrest, weakening the nation, weakening the education system, and overtaxing the medical and social services. Tom Holman the new border czar, estimates that 300,000 unaccompanied minors crossing the border in the Biden Administration have gone missing. America is considered the largest child-sex trafficker in the world. Please sign **The PLEDGE** to protect God's children at **wethecounty.org**.

**SMART Everything:** SMART meters, phones, TV's, appliances, and homes. When you have a SMART device, they control your usage, can shut you off, and record everything. You are always under surveillance. "Colorado utility company locks 22,000 thermostats in 90-degree weather due to 'energy emergency' | Fox Business"

**Wildlands Project:** a master plan to make almost half of the lands in America off limit to human use, all in the name of protecting biodiversity. The Wildlands Project is a detailed map of where you will be allowed to live.

**Mega Region and 15-Minute SMART Cities:** They are also referred to as Green City Centers, Mega Districts, Human Settlements, Islands of Human Habitation, and most recently, Urbanization Projects. Just know that no matter the term used, these areas are all the same. A good example of how they are trying to sell us on this idea is the "15-Minute City." You will need permission to travel outside of your region. In a 15-Minute City, everything is within a 15-minute walk, so you won't need a car. The average size high-rise, will be 600 square feet no matter the size of your family. Areas of Europe have already implemented limited travel with permission. Property tax will be used as a weapon to force people out of their homes.

**Regionalization and 15-Minute SMART Cities** are the slow walk to **Mega Regions**. Regionalization is a remover of borders, where major areas comprised of multiple cities and counties, combine all into one huge area. Now called One Bay area in the San Fransico area is one example. **101 cities and 9 counties all combined in to one**. This removes all control of government from the local level and centralizes it.

**This is happening in some counties like Huron** where the townships have turned over their planning commission and other legal procedures to the County Board of Commissioners.

**Agenda 2030:** When Agenda 21 was first written and subsequently adopted by 180 other nations at the UN Earth Summit in 1992, it was proposed as an agenda for the **21st century**. As time went on, the UN decided that things weren't moving fast enough, so in **2015**, they put a time stamp on the agenda for the **year 2030**.

**U.N.'s Biodiversity Treaty** (1992 U.N. Earth Summit) "Where humans are one strand in nature's web and all living creatures are considered equal." This means **nature, creatures and humans are all equal** (Mother Ghia worship).

### **ESG Score (Environmental, Social, and Governance)**

This is a pay-to-play score. The lower your score, the less benefits you get. If your score gets too low, you get cut off all together. As it stands right now, ESG is only being applied to corporations. Every Fortune 500 company is currently participating in ESG. This is also tied to your ability to borrow money and other benefits.

In the very near future, every entity, whether it be a large corporation, small business, city or state, or an individual will be burdened with **ESG compliance**. Did you ever wonder why Dylan Mulvaney a transgender influencer, was paid to do a Bud Light commercial? Yes, **Bud Light** whose main customer base is males in "red states" or Middle America demographics. Many believe it was because of ESG scores. Same goes for Harley Davidson and John Deere supporting DEI. WEF loyal companies like BlackRock (global management investment firm) buy up stock in large companies and place their people on the board of directors who then influence ESG compliance.

**ESG Reporting:** "2025 marks a pivotal moment in corporate **sustainability**. Companies will begin to report under the EU's **Corporate Sustainability Reporting Directive (CSRD)**, establishing a new standard of unprecedented rigor in ESG reporting. The International Sustainability Standards Board (ISSB) standards are set to become **mandatory** in several countries, promoting **global alignment**. With ESG reporting becoming both mandatory and standardized, businesses around the globe are faced with unprecedented challenges and opportunities." <https://watershed.com/guides/climate->

**ICLEI: International Counsel of Local Environmental Initiatives.** Agenda 21 (2030) is a global plan that is implemented at the local level. This is an NGO at the forefront, helping cities implement this agenda. Like many Marxist-type organizations, they don't tell you their true intent, that they are Marxist. They appear to be well-meaning and good. Once you know the "key words" in their verbiage, you can uncover their agenda.

**ICLEI.org "Local Governments for Sustainability** is a **global** network working with more than 2500 local and regional governments committed to sustainable urban development. Active in 125+ countries, we influence sustainability policy and drive local action for zero emission, nature-based, equitable, resilient and circular development. Our Members and team of experts work together through peer exchange, partnerships and capacity building to create systemic change for urban **sustainability**."

**Zero emissions of CO2** is impossible to reach with our current energy needs and technology. More controls will be placed on our energy development and usage in the name of "saving our planet." CO2 is carbon dioxide, which is plant food!!! All of our trees, plants, farming crops, everything green needs CO2 to grow! When our plants and trees take in CO2, they in turn give off oxygen; the air we need to breathe! LSC has been given an

**In Michigan**, our government wants to clear hundreds of acres of trees (and farm land) to put up solar fields. I don't believe the intent of industrial solar complexes is to "save the environment." Michigan does not produce enough energy for its own usage, so we shut down coal and oil power plants and switch to solar? Michigan is the 4<sup>th</sup> worst state in the USA for harvesting solar power which is not sustainable without subsidies.

To store this energy, massive batteries need to be brought in. These batteries contain toxic and heavy metals such as lithium, cobalt, manganese, nickel, copper, graphite, and aluminum. The harvesting of some of these materials are causing environmental hazards. Once these batteries have completed their useful life, their disposal is causing many concerns for our environment. **April 15<sup>th</sup> 7pm at Life Song;** We The County meeting with Dr Nevin explaining the health risks of industrial solar fields.

Our hope and trust are in Jesus Christ. He is our Protector, our Savoir, our Provider and He loves us and died for us!
